

Product Solutions to Suppress Dust and Reduce Downtime

June 17, 2019

Quaker Chemical Corporation Exhibits at the 2019 DUG East Conference and Exhibition

CONSHOHOCKEN, Pa., June 17, 2019 /PRNewswire/ -- **Quaker Chemical Corporation** (NYSE:KWR, "Quaker") will be showcasing how its **DUSTGRIP® Dust Suppressants** support a safe work environment and offer compliance solutions at the **2019 DUG East Conference and Exhibition**, June 18-20 in Pittsburgh PA, USA. (<https://www.hartenergyconferences.com/dug-east>).

Fugitive dust from unstable roads and oilfields can be an issue in the oil and gas industry. To help with this challenge Quaker offers DUSTGRIP®, a family of dust suppressant products, that now includes **DUSTGRIP® SUPER TAC**, a new generation dust suppressant that binds the surface roadway while maintaining sub-soil moisture content. DUSTGRIP® SUPER TAC is well suited for dry to moderately rainy climates, and has the ability to retain moisture and re-hydrolize after initial application.

Quaker also offers QUINTOLUBRIC® fire-resistant hydraulic fluids and QAKER FORMULA® maintenance cleaners, formulated to have reduced environmental impact:

- **QUINTOLUBRIC®** fire-resistant hydraulic fluids are developed to provide excellent shear stability and best-in-class oxidation stability.
- **QAKER FORMULA® PURE BLUE™ HD** formulated with hard-working surfactants to cut through oil, grease, and shop machinery while also being less irritating for workers.
- **QAKER FORMULA® PURPLE PRO** provides excellent penetration and loosening of soils to efficiently remove soils such as grease, grime and grit from floors, equipment, walls and equipment housings.
